Click & Drink®

Our organic seeds ready-to-drink allow the consumer to have the full benefits of the seeds, because if they are not crunched, the active contents of seeds can not act.

Possibility to customize the shots, the boxes

Our complete industrial control

The process of extraction and production are totally controlled from A to Z.

There are three essential stages:

- Maceration & obtaining of the " juice of plant ", phase of pasteurization by heating vapor.
- Concentration of juice to obtain a liquid or soft extract.
- Choice of use extracts fluid or dry extract.
